U.S. Chamber of Commerce

Trade works for Pennsylvania. Tariffs don't.

Tariffs imposed by the United States are nothing more than a tax increase on American consumers and businesses, including manufacturers, farmers, and technology companies, who will be forced to pay more for commonly used products and materials.

Retaliatory tariffs imposed by the EU and China on U.S. exports will make American-made goods more expensive, resulting in lost sales and ultimately lost jobs here at home. This is the wrong approach, and it threatens to derail our nation's recent economic resurgence.

Pennsylvania Jobs Supported by Trade: 1,658,100
Total State Exports Threatened by New Tariffs: $2,740,607,267

Total Exports to China Threatened by New Tariffs: $2,372,481,292
