1 I. INTERESTS OF AMICUS CURIAE

2 The Chamber of Commerce of the United States of America (“the Chamber”) is the  
3 world’s largest federation of businesses, representing over three million companies as well  
4 as state and local chambers and industry organizations all over the country. It is the voice  
5 of business, fighting for free enterprise before all branches of government at all levels.  
6 An important function of the Chamber is to represent the interests of its members by filing  
7 *amicus curiae* briefs involving issues of national concern to American business.

8 Few issues are of more concern to American business than those pertaining to the  
9 fair administration of punitive damages. The Chamber regularly files *amicus* briefs in  
10 significant punitive damages cases. The Chamber and its members have a substantial  
11 interest in the procedures courts employ in punitive damages cases and in the process by  
12 which trial and appellate courts evaluate jury awards of punitive damages. The Chamber  
13 believes that its familiarity with the law of punitive damages can be of assistance to the  
14 Court not just in resolving the issues raised in this appeal, but also in more broadly  
15 addressing the requirements imposed by due process to protect defendants from  
16 unconstitutionally excessive punitive damages awards like the one at issue here.

17 II. INTRODUCTION

18 In a case awarding a *per se* unconstitutional \$500 million punitive damages award  
19 on \$3.25 million in compensatory damages, something must have gone wrong. In this  
20 case, both liability for punitive damages and the amount awarded resulted from numerous  
21 errors, and the Chamber highlights three particularly egregious ones in this brief. If any  
22 one of these errors had not been committed, the defendants likely would not now face a  
23 judgment for a *per se* unconstitutional punitive damages award. Because the risk of such  
24 arbitrary and crippling awards stands as a potential deterrent for all businesses seeking to  
25 locate in or do business in Nevada, the Chamber urges this Court to reverse the judgment  
26 below and institute reasonable constraints that will prevent their recurrence.

27 First, the District Court wrongly excluded all evidence of regulatory compliance by  
28 the defendants. Throughout the country, state and federal courts have recognized that

1 compliance with regulatory standards is at least indicative—if not dispositive—of a  
2 defendant’s exercise of due care. And under the plaintiff’s theory that the defendants  
3 engaged in “despicable” conduct in “conscious disregard” of their rights and safety,  
4 evidence that the defendants exercised due care and held a reasonable belief that they have  
5 fulfilled their obligations respecting drug safety is highly probative of whether they held  
6 the deplorable state of mind necessary to warrant punitive damages.

7 Second, the plaintiffs provided articles discussing 148 other purported cases of  
8 Hepatitis C outbreaks at endoscopy clinics, and the District Court admitted them over the  
9 defendants’ objection. But these reports were irrelevant and inadmissible, and  
10 impermissibly infected the punitive award. They did not describe any conduct by the  
11 defendants at all, and did not even involve the same factual predicate—the methods of  
12 contamination varied among the reports and *none* of them involved the alleged method of  
13 contamination at issue here.

14 Third, the District Court allowed a patently unconstitutional punitive damages  
15 award to stand. With a compensatory damages award of \$3.25 million, the District Court  
16 entered judgment for \$500 million in punitive damages. The constitutional upper limit for  
17 the ratio of punitive damages to compensatory damages is 9:1 in the abstract. And in a  
18 case like this that involves a high compensatory damages award and a lack of intentional  
19 harm, the maximum allowable ratio is closer to 1:1. Yet the District Court entered a  
20 judgment with a punitive damages ratio of over 150:1. There is no possible justification  
21 for such a large punitive damages award, and this Court should reverse it.

22 **III. ARGUMENT AND AUTHORITIES**

23 **A. The jury should have seen all evidence bearing on the defendants’**  
24 **culpability.**

25 The District Court violated the defendants’ fundamental right to a fair trial by  
26 excluding all evidence pertaining to the defendants’ compliance with government and  
27 industry standards even though that evidence bears directly on whether the defendants had  
28

1 the culpable state of mind to justify awarding punitive damages. In Nevada, punitive  
2 damages may only be awarded if the plaintiff proves “by clear and convincing evidence  
3 that the defendant has been guilty of oppression, fraud or malice.” NRS 42.005.  
4 Oppression and fraud were not submitted to the jury, but the District Court found that  
5 punitive damages were supported by evidence of implied malice. Order Denying  
6 Defendants’ Motion to Alter or Amend Judgment in *Chanin v. Teva Perenteral*  
7 *Medicines, Inc.*, No. A571172 (Clark County District Court Sept. 27, 2010) (“Order”) at  
8 16. Malice “means conduct which is intended to injure a person or despicable conduct  
9 which is engaged in with a conscious disregard of the rights or safety of others.” NRS  
10 42.001. Plaintiffs did not allege that either defendant intended to injure them. Thus, they  
11 had to prove by clear and convincing evidence that the defendants engaged in “despicable  
12 conduct” in “conscious disregard” of their rights or safety.

13 By definition, “[t]he defendant’s state of mind represents a key element in  
14 determining whether a defendant acted with . . . actual malice.” *Malcolm v. Evenflo Co.*,  
15 217 P.3d 514, 530 (Mont. 2009). And “[e]vidence of [a defendant’s] good faith effort to  
16 comply with all government regulations . . . ‘would be evidence of conduct inconsistent  
17 with the mental state requisite for punitive damages.’” *Id.* at 531 (citation omitted). For  
18 that reason, the Supreme Court of Montana reversed a punitive damages award when the  
19 trial court excluded evidence of compliance with government safety standards. *Id.* at 532.  
20 The court recognized that the defendant “may have been able to persuade the jury that its  
21 compliance with [a government safety standard] showed that it had not evinced ‘deliberate  
22 indifference’ to the welfare of” the customers. *Id.* The court ruled that the jury would  
23 also have been free to decide “that evidence of [the defendant’s] misconduct demonstrated  
24 ‘deliberate indifference’” regardless of compliance, “but the District court ‘should not  
25 have preempted that debate by disabling [the defendant] from explaining itself.’” *Id.*  
26 (citation omitted).

27 The Montana Supreme Court is not alone in this understanding. Rather, its holding  
28 that compliance with government safety standards is admissible to disprove punitive

1 damages liability is consistent with the generally accepted principle that “a defendant’s  
2 compliance with governmental regulations [is] evidence of due care.” Richard C.  
3 Ausness, et al., *Providing a Safe Harbor for Those Who Play by the Rules: The Case for*  
4 *a Strong Regulatory Compliance Defense*, 2008 Utah L. Rev. 115, 115-16 (2008) (noting  
5 that most courts consider compliance with governmental regulations as evidence of the  
6 defendant’s use of due care while the remaining courts have found it dispositive). In  
7 Nevada, one exercises due care when his conduct “conform[s] to the legal standard of  
8 reasonable conduct in light of the apparent risk.” *Sims v. Gen. Tele. & Elec.*, 107 Nev.  
9 516, 522 (1991) (citation omitted), *overruled on other grounds by Tucker v. Action Equip.*  
10 *And Scaffold Co.*, 113 Nev. 1349, 1356 n.4 (1997). Thus, evidence of exercising due care  
11 necessarily rebuts an argument that the defendant acted in conscious disregard of others’  
12 safety. Restatement (Second) of Torts, §908 cmt. b. (1965) (the degree of culpability  
13 required for imposition of punitive damages is greater than it is for “ordinary  
14 negligence”). And such evidence must therefore be admissible to rebut a punitive  
15 damages request like the one at issue here. 22 Am. Jur. 2d §725 (2003) (to determine  
16 punitive damages liability, “evidence of any fact which legitimately tends to show the  
17 motive and intent of the defendant in doing the act complained of is admissible”).

18 As this Court has noted, courts around the country have recognized that evidence  
19 of compliance with government regulations and industry standards has least some  
20 probative value on punitive damages liability.<sup>1</sup> Indeed, the national debate on the role of  
21 regulatory compliance is not on whether it is admissible, but rather whether it precludes  
22 imposing punitive damages, creates a presumption against imposing them, or is simply

---

24 <sup>1</sup> See *Wyeth v. Rowatt*, 126 Nev. Adv. Op. No. 44 at \*29-30 (Nov. 24, 2010) (citing  
25 cases). See also *Drabik v. Stanley-Bostitch, Inc.*, 997 F.2d 496, 510 (8th Cir. 1993)  
26 (punitive damages unavailable as a matter of law in part because “[c]ompliance with  
27 industry standard and custom serves to negate conscious disregard”); *Dorsey v. Honda*  
28 *Motor Co.*, 655 F.2d 650, 656 (5th Cir. 1981) (“compliance with regulatory standards may  
be admissible on the issue of care but does not require a jury to find a defendant’s conduct  
reasonable”).

1 probative and admissible evidence. Ausness, 2008 Utah L. Rev. at 155 (“a number of  
2 states have concluded that compliance with government safety standards . . . will preclude  
3 liability for punitive damages, at least in some cases”). There are strong arguments in  
4 favor of regulatory compliance being an absolute defense against punitive damages. *Id.* at  
5 155-57. But this Court recently determined that compliance with regulatory standards  
6 does not bar such liability. *Wyeth*, 244 P.3d 765, 777-78, 126 Nev. Adv. Op. No. 44, at  
7 \*32. Notably, however, the Court did not go so far as to suggest that evidence of  
8 compliance is irrelevant and inadmissible. *Id.* Nor did it address whether there is a  
9 presumption against liability for punitive damages when a defendant complies with  
10 government regulatory standards. Indeed, echoing the Supreme Court of Montana’s  
11 reasoning in *Malcolm*, the Court in *Wyeth* stated that “a **jury** could reasonably determine”  
12 the question of malice based on the language of the defendants’ warnings and its actions.  
13 *Id.* (emphasis added).

14 As in *Wyeth*, the jury was, at a minimum, entitled to consider the issue in this case.  
15 But the jury did not have the opportunity to reach an informed conclusion because the  
16 District Court improperly “preempted that debate” by excluding relevant evidence  
17 regarding the defendants’ culpability. *Malcolm*, 217 P.3d at 352. The defendants  
18 manufactured and supplied a generic FDA-approved drug with FDA-mandated warning  
19 labels that were used by the drug’s inventor and every other company manufacturing a  
20 generic version of that drug. Appellants’ Br. 37, 40. The jury could have found that the  
21 defendants showed no “conscious disregard” for the safety of Propofol users because the  
22 defendants adopted federally-mandated warnings and relied on the basic training of any  
23 doctor regarding the dangers of cross-contamination from re-using medical supplies on  
24 different patients. But the District Court usurped the role of the jury, which was given no  
25 opportunity to weigh that evidence against the plaintiffs’ case. *Cf. Grosjean v. Imperial*  
26 *Palace*, 212 P.3d 1068, 1080 (Nev. 2009) (it is the jury’s role to evaluate the evidence).

27 Moreover, and in addition to being erroneous under Nevada law, the District  
28 Court’s ruling violates the defendants’ constitutional due process rights. “[P]unitive

1 damages are imposed for purposes of retribution and deterrence. They have been  
2 described as quasi-criminal.” *Pacific Mut. Life Ins. Co. v. Haslip*, 499 U.S. 1, 19 (1991)  
3 (citation omitted). Thus, “[d]espite the broad discretion that States possess with respect to  
4 the imposition of criminal penalties and punitive damages, the Due Process Clause of the  
5 Fourteenth Amendment to the Federal Constitution imposes substantive limits on that  
6 discretion.” *Cooper Indus. v. Leatherman Toll Group*, 532 U.S. 424, 433 (2001).

7 One such limit is that a state cannot exclude relevant evidence regarding a criminal  
8 defendant’s mental state if that evidence does not violate some “well-established rule[] of  
9 evidence.” *Clark v. Arizona*, 548 U.S. 735, 770 (2006). Defendants have a right “as a  
10 matter of simple due process to present evidence favorable to [themselves] on an element  
11 that must be proven to convict.” *Id.* at 769 (recognizing defendant’s right to present  
12 evidence that he suffers from mental disease to rebut evidence that he had the required  
13 mens rea at the time of the crime).

14 In light of the quasi-criminal nature of punitive damages and general common law  
15 guidelines for fundamental fairness, that standard should apply to punitive damages  
16 proceedings as well. The Due Process clause mandates “what procedures are necessary to  
17 ensure that punitive damages are not imposed in an arbitrary manner.” *Honda Motor Co.*  
18 *v. Oberg*, 512 U.S. 415, 420 (1994). And in punitive damages cases, it “prohibits a State  
19 from punishing an individual without first providing that individual with ‘an opportunity  
20 to present every available defense.’”<sup>2</sup> *Philip Morris USA v. Williams*, 549 U.S. 346, 353  
21 (2007) (citation omitted). *See also Germanio v. Goodyear Tire & Rubber Co.*, 732 F.  
22 Supp. 1297, 1304 (D.N.J. 1990) (“the requirements of due process in civil cases include[e]  
23 the right to present mitigating evidence on . . . punitive damages”). Moreover, *any*  
24 departure from normal common law procedures “raises a presumption” that the court’s  
25 departure violates the Due Process Clause. *Honda*, 512 U.S. at 430.

---

26  
27 <sup>2</sup> Indeed, this Court has held that, “at a minimum,” even “a quasi-judicial proceeding  
28 must afford each party . . . the ability to present and object to evidence.” *Stockmeier v.*  
*State Dep’t of Corrections*, 122 Nev. 385, 391, 135 P.3d 220, 224 (2006).

1 As discussed above, the general consensus among the states is that compliance  
2 with regulatory standards is admissible to disprove the required mental state for  
3 imposition of punitive damages. *Supra* at 3-4. Accordingly, by depriving defendants of  
4 the ability to present this accepted defense in response to the plaintiffs' effort to impose  
5 quasi-criminal liability, the District Court contravened not only Nevada law but due  
6 process as well. Compliance with regulatory standards goes to the heart of the central  
7 issue undergirding any imposition of punitive damages—the defendants' state of mind.  
8 The District Court therefore violated both Nevada law and the Due Process Clause of the  
9 federal Constitution by excluding this evidence and preventing defendants from  
10 effectively defending themselves.

11 **B. The district court erroneously admitted evidence of conduct related to**  
12 **non-parties.**

13 The District Court further erred by admitting evidence regarding non-parties and  
14 allowing the jury to impute the conduct to the defendants. The first guidepost for  
15 assessing whether a punitive damages award is constitutionally appropriate is “the degree  
16 of reprehensibility *of the defendant’s conduct.*” *Bongiovi v. Sullivan*, 138 P.3d 433, 452,  
17 122 Nev. 556, 583 (2006) (quoting *BMW of North Am., Inc. v. Gore*, 517 U.S. 559, 575  
18 (1996)) (emphasis added). Evidence of *the defendant’s* similar bad acts toward other  
19 parties is thus admissible to prove reprehensibility so long as the court makes it clear to  
20 the jury that the evidence is only to be used to determine reprehensibility and not to  
21 further punish the defendant based on other bad acts. *Philip Morris*, 549 U.S. at 357. But  
22 here, the District Court went well beyond that narrow exception to allow otherwise  
23 inadmissible evidence. It allowed the plaintiffs to present articles regarding 148 other  
24 purported cases of Hepatitis C outbreaks at endoscopy clinics even though those other  
25 purported cases (1) were not attributable to any defendant and (2) were not substantially  
26 similar to the defendants' conduct here.

27 Evidence is only relevant to the first guidepost if it establishes that it is “more or  
28 less probable” that the defendant’s conduct was reprehensible. *See* NRS 48.015 (defining

1 relevance). Therefore, there must be some nexus with the *defendant's* conduct.  
2 Otherwise, the evidence is inadmissible. NRS 48.025(2) (“Evidence which is not relevant  
3 is not admissible.”). Limiting the reprehensibility determination to conduct by the  
4 defendant is consistent with the purposes of punitive damages. Punitive damages are  
5 levied “for the sake of example and by way of punishing the defendant.” NRS 42.005(1).  
6 They “serve the same purposes as criminal penalties” and “pose an acute danger of  
7 arbitrary deprivation of property.” *State Farm Mut. Auto. Ins. Co. v. Campbell*, 538 U.S.  
8 408, 425 (2003) (citation omitted). For that reason, the ability to impose punitive  
9 damages on a defendant is strictly limited to conduct in which it played an active role.  
10 *See, e.g.*, NRS 42.007(1) (limiting vicarious liability for punitive damages).

11 Here, the plaintiffs did not establish *any* nexus between the 148 purported cases  
12 and the defendants’ conduct. There was no evidence that any of those cases involved  
13 Propofol manufactured or distributed by the defendants. Appellants’ Br. 64; *see also* Pl.  
14 Ex. 93, 94, 95, 97, 98, 106, 108, 109; *see also* 4/19/2010 Tr. at 87-93. For that reason  
15 alone, the articles were inadmissible. Indeed, there is no connection at all between the  
16 cases and the defendants’ conduct that could make it more probable that the defendants’  
17 conduct was reprehensible. Yet, without citing any authority allowing evidence of non-  
18 parties’ conduct to be presented as evidence of reprehensibility of the defendants’  
19 conduct, the District Court admitted the plaintiffs’ articles.

20 In any event, the lack of similarity between the conduct described in the articles  
21 and the conduct alleged in this case also rendered the articles inadmissible. The  
22 admissibility of evidence of acts that have harmed people other than the plaintiff in a case  
23 has been limited to evidence of conduct that is similar to the acts that injured the plaintiff.  
24 *State Farm*, 538 U.S. at 424 (“because the Campbells have shown no conduct by State  
25 Farm similar to that which harmed them, the conduct that harmed them is the only  
26 conduct relevant to the reprehensibility analysis”). And none of the cases described in the  
27 articles involved the same warnings or the same contamination method as the one at issue  
28

1 here.<sup>3</sup> Appellants' Br. 56; *see also* Pl. Ex. 93, 94, 95, 97, 98, 106, 108, 109; *see also*  
2 4/19/2010 Tr. at 87-93. Indeed, some of the articles the plaintiffs produced did not refer  
3 to Propofol at all. *See, e.g.*, Pl. Ex. 97.

4 In light of the fundamental differences between the 148 cases described in the  
5 plaintiffs articles and this case, and the fact that none of those cases involved the  
6 defendants, the District Court erred by admitting the articles into evidence at all—whether  
7 to establish reprehensibility or for any other purpose. In *State Farm*, the Supreme Court  
8 was concerned that the case “was used as a platform to expose, and punish the perceived  
9 deficiencies of State Farm’s operations throughout the country.” *State Farm*, 538 U.S. at  
10 420. Far beyond that, the punitive damages award here requires the defendants to pay for  
11 the perceived deficiencies of various *other* drug manufacturers and distributors around the  
12 world for an array of dissimilar conduct. That is not allowable under Nevada law or the  
13 United States Constitution.

14 **C. The \$500 million punitive damages award is unconstitutional.**

15 The 150:1 ratio of punitive damages to compensatory damages here is *per se*  
16 unconstitutional. To evaluate a punitive damage award’s propriety under the U.S.  
17 Constitution, a court must consider “the degree of reprehensibility of the defendant’s  
18 conduct,” the award’s ratio to the “actual harm inflicted,” and how the award compares to  
19 other civil or criminal penalties imposed for similar conduct. *BMW*, 517 U.S. at 575.  
20 This Court has recently adopted the *BMW* test for excessive punitive damages as the  
21 State’s standard as well. *Bongiovi*, 138 P.3d at 583; 122 Nev. at 583. There is no  
22 “mathematical bright line between the constitutionally acceptable and the constitutionally  
23 unacceptable that would fit every case.” *Pacific Mut.*, 499 U.S. at 18. But as a general  
24 limit, “few awards exceeding a single-digit ratio between punitive and compensatory  
25

---

26 <sup>3</sup> This case purportedly involved doctors and nurses (1) using a needle and syringe in  
27 a patient with Hepatitis C, (2) using the dirty device to draw Propofol from a vial—  
28 thereby contaminating the vial’s contents, and (3) later drawing Propofol from that vial for  
use on another patient. *See* 4/19/2009 Tr. at 84:16-85:13.

1 damages to a significant degree, will satisfy due process.” *State Farm*, 538 U.S. at 425.

2 Moreover, the permissible ratio may well be lower than single digits where, as  
3 here, the compensatory award is itself significant. While a one-to-one ratio is a general  
4 “outermost limit” when compensatory awards are substantial, *Exxon Shipping Co. v.*  
5 *Baker*, 554 U.S. 471, 502 (2008); *State Farm*, 538 U.S. at 425, the limit for any particular  
6 award may well be lower, in light of the magnitude of the award, the degree of  
7 reprehensibility, the actual harm to the plaintiff, and comparative penalties, *see*  
8 Appellants’ Br. 77-79. A very large punitive award on top of a very large compensatory  
9 award, even where the ratio is single-digit, will raise more serious due process concerns  
10 than a small punitive award on top of a small compensatory award where the ratio is high.  
11 A \$90 punitive award on top of a \$10 compensatory award is hardly momentous even  
12 though the ratio is nine-to-one. But the award in this case—\$500,000,000 as compared to  
13 harm of \$3,250,000 is *per se* unconstitutional. And even a reduction to 9:1—\$29.25  
14 million—would raise extremely serious concerns. As the Supreme Court has held, even a  
15 \$2 million dollar punitive award—a tiny fraction of the awards in the present cases—is  
16 “tantamount to a severe criminal penalty.” *BMW*, 517 U.S. at 585.

17 Although the District Court purported to evaluate the *BMW* factors in its order  
18 resolving defendants’ post-trial motion, its selection of a 150:1 ratio of compensatory to  
19 punitive damages as the appropriate amount proves it failed to apply those factors in a  
20 meaningful way. Order at 6. The court relied on the United States Court of Appeals for  
21 the Seventh Circuit’s decision in *Mathias v. Accor Economy Lodging, Inc.*, 347 F.3d 672  
22 (7th Cir. 2003), to claim that any ratio under 37:1 (which it perceived as the true ratio  
23 here) is permissible. Order at 16-17. But *Mathias* does not support that conclusion.  
24 *Mathias* involved compensatory damages of only \$5,000 and punitive damages of  
25 \$186,000. 347 F.3d at 674. The Seventh Circuit noted that the compensatory damages  
26 award was relatively low, and expressly stated that the low compensatory award  
27 distinguished that case from *State Farm*, in which \$1 million in compensatory damages  
28 were awarded. *Id.* at 677. The court further justified the large ratio by noting that “the

1 plaintiffs might well have had difficulty financing [the] lawsuit” without such significant  
2 damages being possible. That is, of course, not an issue in a case like this one that results  
3 in a \$3.25 million compensatory damages award.<sup>4</sup> Finally, as the Seventh Circuit  
4 observed in a later case, the court ruled that the award was appropriate based on the harm  
5 inflicted upon others. *Munro v. Golden Rule Ins. Co.*, 393 F.3d 720, 722 (7th Cir. 2004)  
6 (“*Mathias* holds that punitive damages may be a large multiple of any one victim’s loss  
7 when a defendant’s acts inflict small losses on hundreds of people.”). The Supreme Court  
8 has since ruled that justification unconstitutional. *Philip Morris*, 549 U.S. at 353.

9 In any event, the award here far exceeds even the 37:1 ratio the District Court  
10 deemed acceptable. Applying the method used by this Court in *Wyeth*, the ratio here is  
11 over 150:1. *Wyeth*, 244 P.3d at 780, 126 Nev. Adv. Op. No. 44, at \*42 (holding that  
12 punitive damages of “less than three times the compensatory awards” were not excessive  
13 when compensatory damages awarded by the jury were \$23 million and punitive damages  
14 awarded were \$58 million). The mathematical calculation for arriving at a 150:1 ratio is  
15 simple. The compensatory damages awarded were \$3.25 million, which were assessed  
16 jointly and severally. The total punitive damages awarded were \$500 million, yielding a  
17 ratio of 153.85:1. That dwarfs the generally accepted highest allowable ratio—9:1—even  
18 before recognizing that the highest allowable ratio for this case must be closer to 1:1 in  
19 light of (1) the size of the compensatory award, (2) the lack of intentional harm, and (3)  
20 the multiple pending claims. *See* Appellants’ Br. 77-78.

21 The District Court found that the award reached an 18:1 “blended” ratio by  
22 engaging in mathematical contortion without citing any authority to support its formula.  
23 Order at 6. To reach that figure, the court first erroneously inflated the compensatory  
24 damages amount by including attorney’s fees and interest to reach a total of \$13.5 million.

---

25  
26 <sup>4</sup> Mrs. Chanin’s loss of consortium award cannot be added to the \$3.25 million  
27 compensatory award for Mr. Chanin because punitive damages are not available on loss of  
28 consortium claims. Appellants’ Br. 74 n.37; *see also Hale v. Firestone Tire & Rubber*  
*Co.*, 756 F.2d 1322, 1337 (8th Cir. 1985) (collecting cases).

1 *Id.* at 16. The court offered no basis for concluding that it could skew that side of the  
2 equation, and there is no logical reason for doing so. Punitive damages are intended to  
3 punish and deter particular conduct “for the sake of example and by way of punishing the  
4 defendant.” NRS 42.005. The jury in this case determined that the extent of damage  
5 attributable to defendants’ punishable conduct in this case was \$3.25 million. Attorney’s  
6 fees and interest did not result from punishable conduct and were not awarded by the jury.  
7 *See* Appellants’ Br. 74 n.37. Rather, they resulted from the defendants’ exercise of their  
8 right to raise a legitimate defense, which occurs in every case. Therefore, the District  
9 Court should have set the applicable compensatory damages awarded at \$3.25 million in  
10 the same way this Court did in *Wyeth*.

11 In addition, the trial court’s use of the total compensatory damages against each of  
12 the three defendants when calculating the applicable punitive damages ratio for each  
13 defendant violated due process by double-counting the compensatory damages. The trial  
14 court started with its faulty total compensatory award of \$13.5 million. Order at 6. It then  
15 divided that number into each of the two punitive damages awards against the defendants  
16 individually. *Id.* As a result, it reached ratios of 26:1 for Teva and 10.5:1 for Baxter.  
17 Finally, it took the arithmetic mean and rounded down. *Id.* The trial court’s method was  
18 wrong. It “assumes an impossibility . . . because it posits that each defendant will  
19 ultimately pay the full compensatory damages award.” *Grabinski v. Blue Springs Ford*  
20 *Sales, Inc.*, 203 F.3d 1024, 1026 (8th Cir. 2000).

21 When liability is joint and several, the maximum total punitive damages should be  
22 determined by multiplying the total compensatory award by the appropriate punitive  
23 damages ratio. *Id.* Then, the total maximum punitive damages should be apportioned  
24 among the defendants according to each defendant’s individual culpability as found by the  
25 jury. When the jury has not apportioned compensatory damages among the defendants,  
26 the apportionment of punitive damages by the jury serves as a suitable proxy. *See, e.g.,*  
27 *Planned Parenthood of the Columbia/Willamette, Inc. v. Am. Coal. of Life Activists*, 422  
28 F.3d 949, 963-64 (9th Cir. 2005) (apportioning reduced punitive damages award based on

1 jury's apportionment of total punitive damages). This method prevents trial courts from  
2 double counting. And it properly ensures that the total punitive award will be in line with  
3 the total harm done to the plaintiff.

4 In recent years, the Ninth Circuit has consistently adhered to this method. *See*  
5 *Leavey v. Unum Provident Corp.*, 2008 U.S. App. LEXIS 21144, at \*7 (9th Cir. Oct. 6,  
6 2008) (calculating punitive damages ratio based on comparing total compensatory  
7 damages with total punitive damages); *Southern Union Co. v. Irvin*, 563 F.3d 788, 792  
8 (9th Cir. 2009) (same); *Planned Parenthood*, 422 F.3d at 963-64 (same). For example, in  
9 *Southern Union*, 563 F.3d at 791-92, the court twice calculated the punitive damages ratio  
10 based on the portion of the compensatory award allocable to the defendant that appealed  
11 rather than calculating the ratio using the entire compensatory damages award. Using that  
12 ratio, the court reversed an unconstitutional punitive damages award, and then reversed  
13 the trial court yet again when the punitive damages award still came out too high after  
14 remand. *Id.* Similarly, in *Planned Parenthood*, 422 F.3d at 963-64, where there were  
15 multiple plaintiffs and multiple defendants, the court issued a remittitur that first  
16 calculated the total available punitive damages to each plaintiff by multiplying the  
17 maximum constitutionally allowable ratio by that plaintiff's compensatory award and then  
18 dividing the resulting amount proportionately among the defendants based on each  
19 defendant's proportional share of the unconstitutional punitive damages originally  
20 awarded to that plaintiff by the jury.

21 Here, the maximum ratio should be 1:1 in light of the very high compensatory  
22 damages of \$3.25 million. Therefore, if punitive damages are awarded, they should total  
23 \$3.25 million at most and be apportioned between Teva and Baxter based on the 356:144  
24 ratio of punitive damages awarded by the jury. And even if the court adopts the Supreme  
25 Court's outer limit for a \$1 million compensatory award of 4:1, *State Farm*, 398 U.S. at  
26 425, the total punitive damages should not exceed \$13 million. The District Court's \$500  
27 million punitive damages award—about 38 times that—is *per se* unconstitutional.

IV. CONCLUSION

For the foregoing reasons, amicus curiae respectfully request that this Court reverse the judgment below and remand for a new trial on punitive damages liability, or in the alternative, reduce the punitive damages award to a constitutionally allowable figure.

Dated: March 9, 2011.
