INTEREST OF THE AMICUS CURIAE..... 1

INTRODUCTION 1

ARGUMENT 3

I. Hindsight-based attacks on fiduciary decision-making are at odds with ERISA’s text and structure..... 3

II. There is no per se rule rendering CITs imprudent, and Plaintiff’s attempt to cast doubt on CITs’ regulatory framework holds no water. 6

 A. Plaintiff’s attempt to create a per se rule and shift the goalposts puts fiduciaries in a Catch-22. 6

 B. Fearmongering as to the regulation of CITs does not plausibly suggest a fiduciary violated ERISA..... 10

CONCLUSION..... 13

1 **INTEREST OF THE AMICUS CURIAE**

2 The Chamber of Commerce of the United States of America (Chamber) is the
3 world’s largest business organization. As the nation’s leading advocate for business,
4 the Chamber represents companies and professional organizations of every size, in
5 every industry sector, and from every region of the country.¹ Given the importance
6 of the laws governing fiduciary conduct to its members, many of which maintain or
7 provide services to retirement plans, the Chamber regularly participates as amicus
8 curiae in ERISA cases at all levels of the federal-court system. The Chamber submits
9 this brief to provide context on retirement-plan management and how this case is
10 situated in the broader litigation landscape challenging ERISA fiduciaries’
11 investment decisions.

12 **INTRODUCTION**

13 This case is one of many in a recent surge of putative class actions challenging
14 the management of employer-sponsored retirement plans. This explosion in
15 litigation is not “a warning that retirees’ savings are in jeopardy.” Daniel Aronowitz,
16 *Exposing Excessive Fee Litigation Against America’s Defined Contribution Plans 3*,
17 *Euclid Specialty* (Dec. 2020), bit.ly/4aqLdZ7. To the contrary, “in nearly every case,
18 the asset size of many of these plans being sued has increased—often by billions of
19 dollars”—over the last decade. *Id.* Nevertheless, many of these suits cherry-pick
20 particular data points, disregard bedrock principles of plan management and
21 investment strategies, and ignore critical context demonstrating the flawed nature of
22 many plaintiffs’ allegations to create an illusion of mismanagement and imprudence.

23 This case is no different. ERISA plaintiffs have spent more than a decade
24 challenging fiduciaries for offering mutual funds instead of collective investment
25 trusts (CITs) that employ the same investment approach, claiming that the inclusion

26 _____
27 ¹ No counsel for a party authored this brief in whole or in part. No party, no counsel
28 for a party, and no person other than Amicus, its members, or its counsel made a
monetary contribution intended to fund the preparation or submission of this brief.

1 of mutual funds in a 401(k) plan lineup was a clear sign that fiduciaries were asleep
2 at the wheel and failing in their obligation to ensure cost-conscious plan management.
3 Plaintiff here takes the exact opposite approach, claiming that the decision to offer
4 CITs rather than mutual funds that employ the same investment approach is
5 categorically indicative of imprudence. If nothing else, this case demonstrates
6 definitively what plan sponsors have observed from 401(k) litigation for decades:
7 they will be a target for strike suits no matter what decisions they make.

8 These per se theories of fiduciary breach find no basis in ERISA’s text or
9 structure. The Supreme Court and Ninth Circuit have been clear that allegations of
10 a breach of a fiduciary duty require a context-specific inquiry, which does not lend
11 itself to per se rules. Plaintiff, in contrast, completely ignores the relevant context—
12 the relative pros and cons of the two types of investment styles (which may “implicate
13 difficult tradeoffs”), the relative regulatory oversight mechanisms for the different
14 investment options, and the overall context of fiduciary management, which vests
15 fiduciaries with enormous discretion and flexibility to exercise “reasonable
16 judgment[.]” based on the facts and circumstances of the plan and its participants, not
17 to mention the fiduciary’s own “experience and expertise.” *Hughes v. Nw. Univ.*,
18 595 U.S. 170, 177 (2022).

19 Against this backdrop, it is critical that courts do not shy away from the
20 “context-specific inquiry” ERISA requires. *Hughes*, 595 U.S. at 173; *see also Fifth*
21 *Third Bancorp v. Dudenhoeffer*, 573 U.S. 409, 425 (2014). If these types of
22 conclusory and speculative complaints are sustained, plan participants will be the
23 ones who suffer. Fiduciaries will be pressured to limit investments to a narrow range
24 of options at the expense of providing a diversity of choices with a range of fees, risk
25 levels, and potential performance upsides, as ERISA requires in the case of a self-
26 directed plan,² such as the one Plaintiff currently challenges, and most participants

27 ² *See* 29 C.F.R. § 2550.404c-1(a)(3) (providing that to meet Section 404(c)’s safe
28 harbor provision, ERISA plan must offer “at least three investment alternatives:

1 want. Yet as this case shows, even that will not protect them from lawsuits, and the
2 litigation costs will have to come from *somewhere*, likely by diluting the generosity
3 of benefits employers are able to offer. That outcome helps no one—aside from the
4 lawyers litigating these cases.³

5 ARGUMENT

6 I. Hindsight-based attacks on fiduciary decision-making are at odds with 7 ERISA’s text and structure.

8 When Congress enacted ERISA, it “did not *require* employers to establish
9 benefit plans.” *Conkright v. Frommert*, 559 U.S. 506, 516 (2010) (emphasis added).
10 Rather, it crafted a statute intended to encourage employers to offer benefit plans
11 while protecting the benefits promised to employees. *Id.* at 516-17. Congress
12 recognized plan sponsors and fiduciaries must make a range of decisions and
13 accommodate “competing considerations.” H.R. Rep. No. 96-869(I), at 67 (1980),
14 *reprinted in* 1980 U.S.C.C.A.N. 2918, 2935. Accordingly, Congress chose the
15 flexible “prudent man” standard to define the scope of the duties fiduciaries owe to
16 plans and their participants. 29 U.S.C. § 1104(a); *Fine v. Semet*, 699 F.2d 1091, 1094
17 (11th Cir. 1983). Neither Congress nor the Department of Labor (DOL) provides a
18 list of required or forbidden investment options, investment strategies, service
19 providers, or compensation structures. And when Congress considered requiring
20 plans to offer at least one index fund, the proposal failed. *See* H.R. 3185, 110th Cong.

21 (1) Each of which is diversified; (2) Each of which has materially different risk and
22 return characteristics; (3) Which in the aggregate enable the participant or beneficiary
23 ... to achieve a portfolio with aggregate risk and return characteristics at any point
24 within the range normally appropriate for the participant or beneficiary; and (4) Each
25 of which when combined with investments in the other alternatives tends to minimize
26 through diversification the overall risk of a participant’s or beneficiary’s portfolio”).

27 ³ The Chamber focuses primarily on Plaintiff’s novel CIT challenge, but agrees with
28 Defendant that all of Plaintiff’s claims should be dismissed. For example, the
Chamber has written extensively about Plaintiff’s forfeiture challenge, which has
recently been in vogue among the ERISA plaintiffs’ bar, and refers the Court to the
Chamber’s prior amicus briefs on that issue in two cases currently pending in the
Ninth Circuit. *See, e.g.,* Chamber Amicus Br., *Hutchins v. HP Inc.*, No. 25-826 (9th
Cir.) (appeal pending), bit.ly/3PHZytK; *Wright v. JPMorgan Chase & Co.*, No. 25-
4235 (9th Cir.) (appeal pending), bit.ly/4vr75Mf.

1 (2007). Indeed, DOL has declined to provide even *examples* of appropriate
2 investment options, because doing so would “limit ... flexibility in plan design.” 57
3 Fed. Reg. 46,906, 46,919 (Oct. 13, 1992).

4 As courts have recognized, the broad discretion conferred by Congress is the
5 “sine qua non of fiduciary duty.” *Pohl v. Nat’l Benefits Consultants, Inc.*, 956 F.2d
6 126, 129 (7th Cir. 1992). Discretion is critical to the entire ERISA framework,
7 because there virtually never is a single “right” answer to the questions fiduciaries
8 must answer. There are thousands of reasonable investment options with different
9 investment styles and risk levels. Given the vast array of options and the need to
10 tailor solutions to participants and their diverse interests, plan fiduciaries are best
11 positioned to weigh the pros and cons of various choices. If a fiduciary is subjected
12 to constant litigation and Monday-morning quarterbacking over decisions—with the
13 benefit of hindsight and not “based upon information available to the fiduciary at the
14 time of each investment decision,” *Anderson v. Intel Corp. Inv. Policy Comm.*, 137
15 F.4th 1015, 1021 (9th Cir. 2025) (*Intel*) (citation omitted), *certiorari granted*, 2026
16 WL 120679 (U.S. Jan. 16, 2026)—that would eviscerate the discretion at ERISA’s
17 core.

18 Put simply, “ERISA ‘requires prudence, not prescience.’” *Intel*, 137 F.4th at
19 1021 (citation omitted). Accordingly, courts “evaluate prudence prospectively,
20 based on the methods the fiduciaries employed, rather than retrospectively, based on
21 the results they achieved.” *Id.* at 1021. This “context-sensitive” analysis therefore
22 focuses on “the circumstances ... prevailing *at the time the fiduciary acts.*”
23 *Dudenhoeffer*, 573 U.S. at 425 (emphasis added) (quotation marks omitted).

24 Given this focus on process, the most natural way to “plead a breach of the
25 duty of prudence” is to “allege[] facts that would directly show that the fiduciaries
26 employed unsound methods in making their investment decisions.” *Intel*, 137 F.4th
27 at 1021-22 (collecting examples). To be sure, it is not automatically “fatal” when a
28

1 complaint “contains no factual allegations referring *directly* to [the fiduciary’s]
2 knowledge, methods, or investigations at the relevant times.” *Pension Ben. Guar.*
3 *Corp. ex rel. St. Vincent Catholic Med. Ctrs. Ret. Plan v. Morgan Stanley Inv. Mgmt.*
4 *Inc.*, 712 F.3d 705, 718 (2d Cir. 2013) (*PBGC*). Sometimes, “a plaintiff can make
5 circumstantial factual allegations from which the court may reasonably infer from
6 what is alleged that the process was flawed.” *Intel*, 137 F.4th at 1022 (quotation
7 marks omitted). But “[w]hen an ERISA plaintiff attempts to do so by relying on a
8 theory that a prudent fiduciary in like circumstances would have selected a different
9 fund based on the cost or performance of the selected fund,” then at a bare minimum
10 “that plaintiff must provide a sound basis for comparison.” *Id.* (quotation marks
11 omitted). In other words, because courts “evaluate prudence prospectively,” “it is not
12 enough for a plaintiff simply to allege that the fiduciaries could have obtained better
13 results—whether higher returns, lower risks, or reduced costs—by choosing different
14 investments.” *Id.* at 1021. Instead, if “a plaintiff asks a court to infer that a fiduciary
15 used improper methods based on the performance of the investments, ... he must
16 compare that performance to funds or investments that are meaningfully similar.” *Id.*
17 at 1023. The “same reasoning holds for ... allegations that investors in the
18 [defendant’s] plans incurred higher fees. As with [] performance allegations, the fact
19 that different kinds of funds with distinct objectives and approaches carried different
20 fees does not by itself demonstrate imprudence.” *Id.*; *see also Albert v. Oshkosh*
21 *Corp.*, 47 F.4th 570, 581 (7th Cir. 2022) (“A complaint cannot simply make a bare
22 allegation that costs are too high, or returns are too low. ... Rather, it must provide a
23 sound basis for comparison—a meaningful benchmark.” (brackets and quotation
24 marks omitted; ellipses in original)).

25 The upshot of these cases is clear. To state a plausible imprudent-fiduciary
26 claim, ERISA plaintiffs must either plead direct factual allegations of an imprudent
27 process, or else must have strong circumstantial pleadings that the fiduciary’s
28

1 investment choices were poor when measured against an array of meaningfully
2 similar comparators. Hindsight-based allegations that ignore the circumstances and
3 considerations around a particular fiduciary choice are insufficient.

4 **II. There is no per se rule rendering CITs imprudent, and Plaintiff’s**
5 **attempt to cast doubt on CITs’ regulatory framework holds no water.**

6 **A. Plaintiff’s attempt to create a per se rule and shift the goalposts**
7 **puts fiduciaries in a Catch-22.**

8 Plaintiff’s Complaint puts fiduciaries in an impossible position: Plaintiff seeks
9 to create a bright-line rule automatically rendering CITs imprudent and mutual funds
10 prudent when plaintiffs have spent the past decade challenging fiduciaries for doing
11 precisely that—offering mutual funds over CITs. That request for a *per se* rule flies
12 in the face of ERISA’s contextual-based analysis and ignores the safeguards in place
13 to protect CIT investors. CITs, also known as “common trusts,” are “institutional
14 investment vehicles” that are “only accessible to certain types of investors, including
15 participants in employer-sponsored retirement plans.” T. Rowe Price Participant
16 Insights, Collective Investment Trusts (2021), bit.ly/4uITtMl. These trusts “are
17 managed by banks or trust companies that ‘pool’ retirement plan assets into a single
18 portfolio that is invested with a specified investment philosophy and strategy” and
19 “may invest in a wide range of active or passive investment vehicles.” *Id.* The
20 “primary objective of a collective fund is, through economies of scale, to lower costs
21 with a combination of profit-sharing funds and pensions.” *Terraza v. Safeway Inc.*,
22 241 F. Supp. 3d 1057, 1064 (N.D. Cal. 2017) (citation omitted). CITs do share
23 similarities with mutual funds “in that they are composed of pooled assets invested
24 with a specified philosophy and strategy.” *See* T. Rowe Price Participant Insights,
25 *supra*. But CITs, unlike mutual funds, “are not available to individual investors and
26 are not advertised to the public.” *Id.* Indeed, the “essential features” of CITs and
27 mutual funds “differ so significantly” that courts have deemed comparisons of mutual
28 funds to collective trusts as “an ‘apples-to-oranges’ comparison.” *See White v.*

1 *Chevron Corp.*, 2017 WL 2352137, at *11 (N.D. Cal. May 31, 2017).

2 According to Plaintiff, however, if “publicly available Plan document[s]” do
3 not “disclose[] the total expense ratios or all-in costs” of the CIT fund, as well as “the
4 basis on which these funds were selected over competing CIT or mutual fund
5 alternatives, or any analysis showing that the CIT fees are reasonable in light of the
6 services provided,” the fiduciaries have breached their “duty to ensure that the
7 transition does not diminish the transparency of fees and investment information
8 available to participants.” Compl. ¶ 71. That is nothing more than an attempt to
9 paint the selection of a CIT fund as automatically imprudent (or permitting an
10 inference of imprudence) without using the phrase “per se.” Additionally, “publicly
11 available” information is not the only (or even primary) way for plan fiduciaries—or
12 participants—to obtain information about potential investment options that allows
13 them to evaluate the reasonableness of fees and expenses. As DOL has indicated in
14 guidance to fiduciaries on meeting their fiduciary responsibilities, there is a very
15 simple way to obtain information from investment providers—they can just “ask.”
16 DOL, *Meeting Your Fiduciary Responsibilities* 6 (Sept. 2021), <https://tinyurl.com/yx9nbrv>. DOL has also promulgated regulations that require fiduciaries to collect
17 information regarding the fees and performance of each investment option offered
18 under the Plan and to provide that information to participants. 29 C.F.R.
19 § 2550.404a-5. In short, CITs are not a black box. CIT investment managers
20 frequently provide information to plan fiduciaries regarding expenses (among other
21 things), and plan administrators are required to provide disclosures, including with
22 respect to performance and fees, to participants.
23

24 Moreover, Plaintiff fails to grapple with how per se theories “run[] contrary to
25 the Supreme Court’s instruction that the plausibility of allegations of breach of
26 fiduciary duty is a ‘context specific’ inquiry dependent on the particular
27 circumstances at issue.” *Wright v. JPMorgan Chase & Co.*, 2025 WL 1683642, at
28

1 *5 (C.D. Cal. June 13, 2025) (quoting *Dudenhoeffer*, 573 U.S. at 421). The Ninth
2 Circuit itself has highlighted that context-specific inquiry when previously rejecting
3 as untenable attempts to create bright-line rules in the ERISA context, because
4 “[t]here are simply too many relevant considerations for a fiduciary.” *See Tibble v.*
5 *Edison Int’l*, 729 F.3d 1110, 1135 (9th Cir. 2013) (rejecting “bright-line approach to
6 prudence” where plaintiff launched “a broadside against retail-class mutual funds”
7 and recognizing Seventh Circuit agreement), *vacated on other grounds*, 135 S. Ct.
8 1823 (2015).

9 This *particular* per se theory is especially chafing given the history of ERISA
10 plaintiffs’ 401(k) line-up challenges over the past decade. Courts have recognized
11 that “collective trusts ... are ... common investment instruments with the potential to
12 outperform mutual funds” given their lower investment-management fees due to the
13 economies of scale for these investment vehicles. *See Moitoso v. FMR LLC*, 451 F.
14 Supp. 3d 189, 212 (D. Mass. 2020) (collecting cases). And for more than a decade,
15 plaintiffs have been targeting fiduciaries for deigning to offer mutual funds within
16 their 401(k) plan line-up rather than offering CIT versions of the same investment.
17 *See, e.g., Davis v. Salesforce.com, Inc.*, 2020 WL 5893405, at *6 (N.D. Cal. Oct. 5,
18 2020) (addressing “an imprudence claim predicated on a comparison of mutual funds
19 with collective trusts”); *Tobias v. NVIDIA Corp.*, 2021 WL 4148706, at *9 (N.D. Cal.
20 Sept. 13, 2021) (“Plaintiffs allege that Committee Defendants failed to utilize
21 collective trusts when such options were available.”); *White*, 2017 WL 2352137, at
22 *12 (plaintiffs arguing “the fiduciaries imprudently offered mutual funds when the
23 Plan could have used less expensive institutional products, such as collective trusts
24 or separate accounts”); *Miguel v. Salesforce.com, Inc.*, 2024 WL 1222092, at *1
25 (N.D. Cal. Mar. 20, 2024) (plaintiff challenging defendants for “failing to substitute
26 the Fidelity mutual funds with Fidelity collective investment trusts”); *Kendall v.*
27 *Pharm. Prod. Dev., LLC*, 2021 WL 1231415, at *8 (E.D.N.C. Mar. 31, 2021);
28

1 *Moitoso*, 451 F. Supp. 3d at 210; *Ferguson v. Ruane Cunniff & Goldfarb Inc.*, 2019
2 WL 4466714, at *10 (S.D.N.Y. Sept. 18, 2019); *Larson v. Allina Health Sys.*, 350 F.
3 Supp. 3d 780, 795 (D. Minn. 2018); *Main v. Am. Airlines Inc.*, 248 F. Supp. 3d 786,
4 794 (N.D. Tex. 2017); *Moreno v. Deutsche Bank Ams. Holding Corp.*, 2016 WL
5 5957307 (S.D.N.Y. Oct. 13, 2016).

6 Plaintiff here is claiming *exactly the opposite*—that the mere fact that
7 fiduciaries have chosen to include CITs instead of mutual funds (as ERISA plaintiffs
8 have for a decade claimed is the only prudent option) is a clear sign that fiduciaries
9 must have been asleep at the wheel. *See* Compl. ¶ 71. It is no wonder Lithia is
10 exasperated. Importantly, the point is not that *this plaintiff* is wrong and plaintiffs
11 for the last decade have been right—that CITs are categorically prudent and mutual
12 funds are a clear sign of fiduciary misfeasance. Nor is the point that *this plaintiff* is
13 right and ERISA plaintiffs for the last decade have been wrong. Instead, the point is
14 precisely what the Supreme Court has acknowledged: “At times, the circumstances
15 facing an ERISA fiduciary will implicate difficult tradeoffs, and courts must give due
16 regard to the range of reasonable judgments a fiduciary may make based on her
17 experience and expertise.” *Hughes*, 595 U.S. at 177. CITs and mutual funds are *both*
18 reasonable options for plan fiduciaries to select, but they do offer different costs and
19 benefits. Given ERISA’s process-based inquiry, the mere fact that a fiduciary chose
20 one investment vehicle over the other says nothing about whether the fiduciary had
21 a sound process in place to make that choice.

22 As this case demonstrates perhaps better than any other, ERISA fiduciaries
23 making discretionary decisions are at risk of being sued seemingly no matter what
24 decisions they make. The plaintiffs in the myriad cases *supra* would have had no
25 objection to the fiduciaries’ decision to offer CITs in this case, yet Plaintiff has
26 targeted Lithia’s fiduciaries for offering exactly what others have lauded, giving new
27 meaning to the phrase “cursed-if-you-do, cursed-if-you-don’t.” This dynamic has
28

1 made it incredibly difficult for fiduciaries to do their jobs—and, as this case reveals,
2 it has made it virtually impossible for fiduciaries to avoid being sued, no matter how
3 careful their process and how reasonable their decisions.

4 **B. Fearmongering as to the regulation of CITs does not plausibly**
5 **suggest a fiduciary violated ERISA.**

6 Even setting aside the Catch-22 Plaintiff seeks to place all fiduciaries in,
7 Plaintiff’s grounds for creating a new bright-line rule—that CITs are “structurally
8 opaque” and subject to a different regulatory framework compared to mutual funds—
9 ignores the rigorous scrutiny state governments give to CITs and the reasons
10 underlying the different regulatory regimes.

11 Plaintiff faults CITs for not being regulated by the SEC like mutual funds,
12 Compl. ¶ 67, but the fact that CITs do not fall within the SEC’s purview does not
13 mean CITs are not regulated. “CITs are primarily regulated by the Office of the
14 Comptroller of the Currency or state banking regulators.” Investor.gov, *Collective*
15 *Investment Trust (CIT)*, U.S. SEC, bit.ly/3Qmz4h7 (last visited June 10, 2026).
16 Indeed, Plaintiff recognizes as much. Compl. ¶ 67 (acknowledging that CITs are
17 “governed by the Office of the Comptroller of the Currency ... or state banking
18 regulators”). More specifically, a “CIT is subject to regulation and oversight under
19 the banking law governing its trustee, such as the National Bank Act and the rules
20 and regulations of the Office of the Comptroller of the Currency (the ‘OCC’) for
21 national banks and federal savings associations, a state’s banking law for banks and
22 trust companies established under state law, and general common law principles of
23 fiduciary duties.” Great Gray Trust Co., *Governance of Collective Investment Trusts:*
24 *Benefits To Plan Investors 2* (2024), bit.ly/4v6oTwx (*Governance of CITs*). And
25 even though “CITs sponsored by state-chartered institutions are not directly subject
26 to OCC regulation, many states apply the OCC’s rules either by statute, rule, other
27 guidance or as best practices in examining state bank collective trust activities.”

1 Coalition of Collective Investment Trusts, *Collective Investment Trusts* 10 (2015),
2 bit.ly/4el5qC1; *Governance of CITS, supra*, at 6 (noting that “non-OCC regulated
3 banks and trust companies generally use [the OCC’s Handbook] as a guide to best
4 practices in managing a CIT”). And adding to this web of regulations is ERISA itself:
5 “because CITs by definition serve as investment vehicles exclusively for retirement
6 assets ..., they are subject to the fiduciary responsibility and prohibited transaction
7 rules” under ERISA. *Governance of CITS, supra*, at 2.

8 The extensive regulatory regime governing CITs ensures that there is no
9 regulatory gap as Plaintiff tries to suggest (Compl. ¶ 79). For instance, Plaintiff
10 complains that “CITs are not required to maintain independent boards of directors.”
11 Compl. ¶ 80. CITs, however, are far from ungoverned and instead “are governed by
12 trustees that must adhere to the regulatory regime founded on fiduciary principles
13 arising under ERISA, state or federal banking law, and common law.” Great Gray
14 Trust Co., *CITs vs. Mutual Funds: Key Differences Explained* (Sept. 13, 2024), [bit.ly/](https://bit.ly/3RCV2wP)
15 [3RCV2wP](https://bit.ly/3RCV2wP).

16 Plaintiff largely hangs his complaint on participants not having access to the
17 same types of disclosures they would have access to for mutual funds. *See, e.g.*,
18 Compl. ¶¶ 74-76. But Plaintiff overlooks how “CIT managers typically produce fact
19 sheets, provide standardized performance information and expense disclosures, and
20 distribute investment commentary in the same format as mutual funds.” John
21 Hancock, *What is a CIT?* (Apr. 6, 2026), bit.ly/49Cr2XW. More specifically,
22 “[m]ost CIT providers also prepare a fund offering document ... that further
23 describes, among other things, the fund’s material terms, investment objective and
24 strategy, policies, fees/expenses and risk characteristics.” Coalition of Collective
25 Investment Trusts, *CIT Myths and Facts* 2 (May 2022), bit.ly/4vwm8nX. Notably,
26 “[t]hese documents are designed to provide similar information to that which an
27 investor would find in a mutual fund prospectus.” *Id.* That those documents are not
28

1 posted on a website like mutual fund disclosures does not mean they do not exist.

2 Moreover, the driving force between the different regulatory systems
3 governing CITs and mutual funds is the difference in eligible investors. Unlike CITs,
4 “[m]utual fund shares are permitted to be publicly offered to both institutional and
5 retail investors, including possibly unsophisticated individuals.” *Governance of*
6 *CITs, supra*, at 3. Because of that difference in sophistication, the SEC imposes
7 certain requirements to provide greater protection. *Id.* (discussing SEC requirement
8 that mutual funds “sell shares only pursuant to an effective, up-to-date ...
9 prospectus”). In contrast, “CITs cannot be sold directly to the general public or any
10 institution. They can only be sold to qualified retirement plans managed by persons
11 who are subject to various fiduciary duties.” *Id.* at 3-4. Precisely because CITs are
12 “available exclusively to qualified retirement plans that are institutional investors (or
13 represented by sophisticated persons), there are no specific disclosure, distribution or
14 registration requirements,” but “general fiduciary considerations that require accurate
15 disclosures to investors and no misleading statements” and “streamlined disclosure
16 requirements under ERISA” remain. *Id.* at 4.

17 To nevertheless claim that Lithia’s fiduciaries acted imprudently, Plaintiff
18 characterizes CITs as a black box that blinds fiduciaries too. *See Compl.* ¶ 81. To
19 the extent Plaintiff claims fiduciaries cannot “rely on public market forces,
20 standardized retail disclosures, or SEC oversight to evaluate CITs,” *Compl.* ¶¶ 79,
21 81, these are not the sole ways for fiduciaries to monitor potential investments, as
22 noted previously. *See supra* p. 7-8. “Since 2011, the Department of Labor has
23 mandated that certain plan administrators provide uniform performance, fee and
24 other disclosures to plan participants regarding all investment options offered in
25 401(k) retirement plans,” which would include CITs. *Governance of CITs, supra*, at
26 4. To provide those disclosures to participants, plainly plan fiduciaries have to obtain
27 that information from CIT providers. And indeed, “many CITs issue quarterly fact
28

1 sheets and fund data is readily available.” *Id.*

2 Put simply, CITs are not the Wild West—they are subject to overlapping layers
3 of protection that exist specifically to protect plan participants, all of which Plaintiff
4 glosses over. But this Court should not gloss over it because the regulatory landscape
5 is precisely the type of “context” that the Supreme Court has repeatedly reminded
6 courts that they should consider when evaluating the plausibility of fiduciary-breach
7 claims. *Hughes*, 595 U.S. at 172, 173; *Dudenhoeffer*, 573 U.S. at 425. Completely
8 ignoring the complex and interlocking protections that exist through heavy state
9 regulation does not plausibly suggest plan fiduciaries were asleep at the wheel simply
10 because they chose an investment that Plaintiff does not prefer. If Plaintiff’s theory
11 were the rule, then every fiduciary of a plan investing in CITs could be expected to
12 be haled into court—and in the United States, CITs alone accounted for more than
13 50% of industry assets in 2025, Mot. to Dismiss 16—simply for making the
14 extraordinarily popular decision to offer this low-cost method of investing to plan
15 participants that ERISA plaintiffs’ lawyers have for years posited is the *only* prudent
16 option. That is not how the statute works.

17 **CONCLUSION**

18 For the foregoing reasons, this Court should dismiss the Class Action
19 Complaint.

20 Respectfully submitted,

21 Dated: June 10, 2026
