

Remove unnecessary barriers to building new energy infrastructure

- Eliminate bureaucratic delays in permitting.
- Increase certainty of the permitting process.
- Improve scoping predictability and consistency in the permitting process.

Continue to increase America's energy security through expanded domestic production and decreased imports with fuel-neutral policies

- Increase access for production of domestic natural gas, oil, and wind by finalizing a robust offshore energy program.
- Invest in the technologies of tomorrow including energy storage, carbon capture utilization and storage, and advanced nuclear.

Foster a commonsense energy strategy to help keep America secure, prosperous, and clean.
