Tax and Entitlement Reform

The U.S. Chamber is committed to comprehensive reforms to the American tax system that will foster job growth, increase American global competitiveness, and attract international investment and innovation.

The Chamber believes that reforms to entitlement programs like Medicare and Medicaid will help reduce deficit spending, strengthening the long-term fiscal health of the nation and protecting these programs for future generations.

The Chamber's Plan to Achieve Tax and Entitlement Reform

- Promote comprehensive tax reform that achieves a smarter, streamlined tax system that will allocate taxpayer dollars more effectively and unleash the power of American businesses—small and large—to create jobs.

- Pursue a pro-growth tax agenda that broadens the base, lowers rates, and simplifies compliance.

- Establish tax policy that is permanent to give certainty to businesses striving to expand, create jobs, and remain competitive in the United States and abroad.

- Seek serious, responsible reforms to America’s entitlement programs, many of which are presently unsustainable.
